

Translator Update 2 and Presentation Plan

Answer the questions below and submit them as a PDF. Please try to keep it brief.

1. At this point, you should have made a decent start on the translator and hopefully have at least some of the features working. Describe the progress you have made so far.
2. Describe any challenges you have encountered with the translator and how you solved them or, if they have not been solved, what have you tried?
3. Describe your plan for the sample programs. Make sure that everything you want graded is showcased in at least one program.
4. Describe your plan for the presentation. Make sure you include all the required parts and make sure it is well-organized. One thing you also need to be sure of is to make sure that there are clear instructions for how we can run your programs.
5. List any questions or concerns you have about the project so far. Again, I do not have time to “grade” or give feedback on everyone’s work so far. But I can address any specific questions or concerns you might have.
6. Give a brief summary of what each member of your group has done so far.
